ORDERING INFORMATION

ABOUT US:

We pride ourselves on providing quality products at reasonable prices with courteous service and knowledgeable advice. We have been in business since 1981. Many of our customers are veteran airbrush artists who rely on our quick service.

Orders of in stock items, placed by 3 p.m. EST, will be shipped the same day. 99% of the items in our catalog are kept in stock at all times unless otherwise noted.

PAYMENT:

We accept payment by MasterCard, Visa, Discover, American Express, Money Order or Certified Check. With prior approval, we will accept company checks - 3 trade references are required.

SHIPPING & DELIVERY:

Orders are generally shipped by U.P.S. Most orders are shipped same day. Occasionally, but not often, there is a back-order. We will let you know which items will be delayed and when to expect them. U.P.S. Ground Service is cost effective and most customers receive 1 to 4 day service. Plan your orders accordingly. If you need an order fast - 1, 2, and 3 day air service is available. **Florida orders receive Next Day Service.**

Please call before 3 P.M. EST for same day shipment.

SCHOOLS:

Please contact us with your needs. Our knowledgeable staff will assist you in choosing the right equipment and supplies at attractive prices.

PRICES:

Catalog prices are current as of the date on the front cover. However, **prices are subject to change without notice.** We will notify you at the time of your order if there has been a price change.

PRICE MATCHING:

Although we price our items aggressively, you may, on occasion, find a lower price somewhere else. If you prefer to order from us - give us a call - we'll try to match the lower price - or beat it - if we can. Our only requirement is that our competitor must have the item in stock, ready to ship.

RETURN POLICY:

Our return policy is simple - our goal is your satisfaction. **Defective items** will be replaced or repaired - we'll pay shipping both ways. **Unwanted items** must be in new and saleable condition, with all original packing. You pay return shipping. We'll refund the purchase price but not shipping costs.

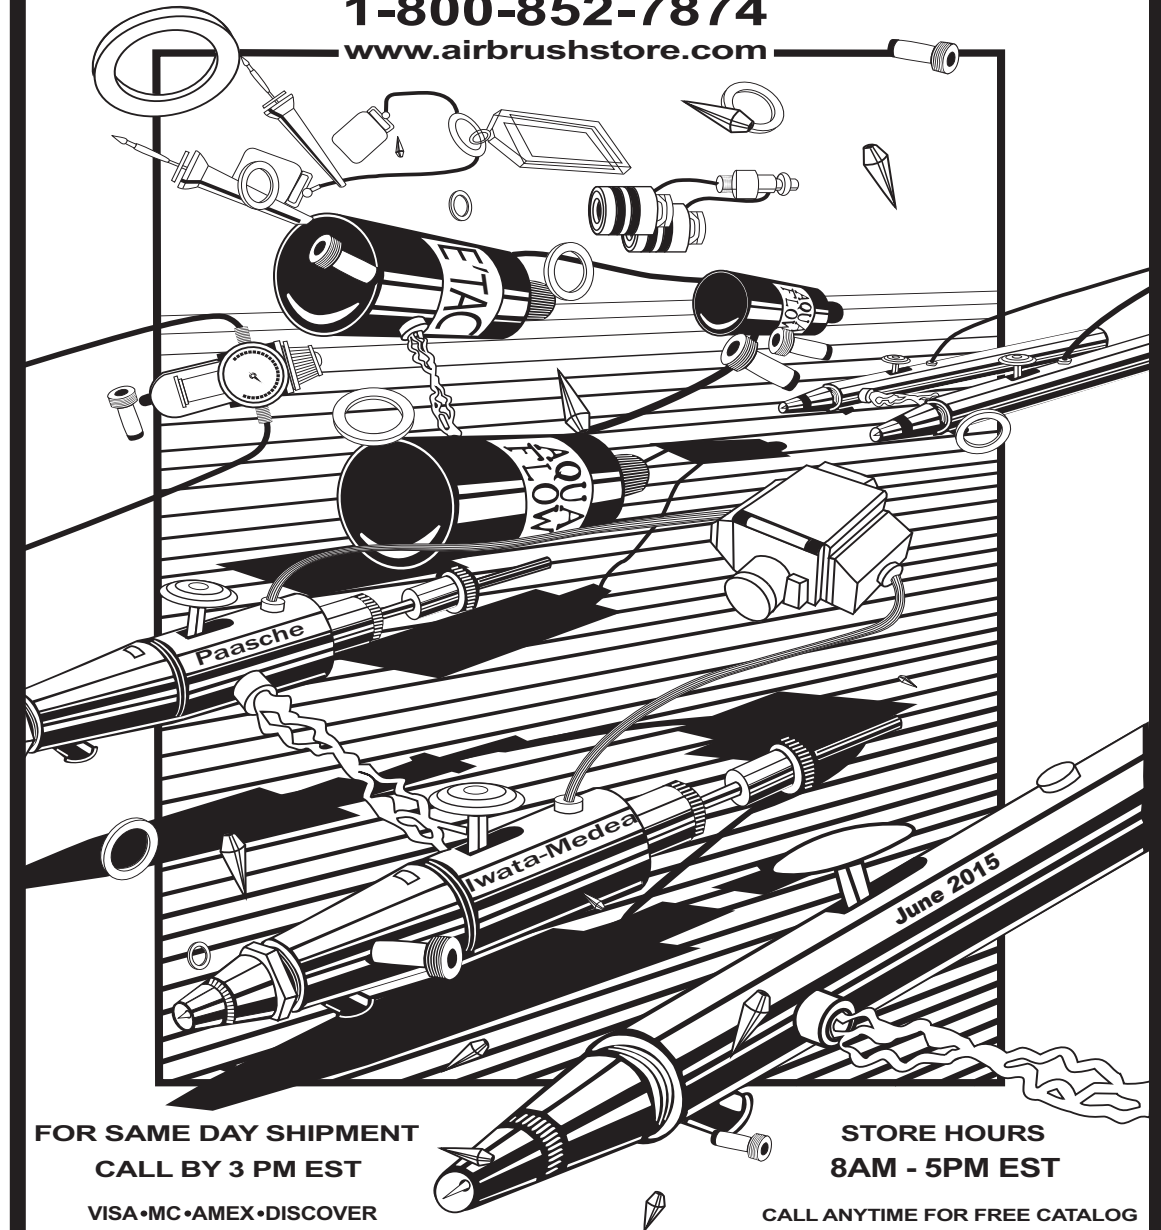

As each situation is unique, please call us before returning anything.

INTRODUCTORY SETS

Aqua Flow 2 oz. Color Sets
Our Price \$19.95

- AF SET 1** - Primary Colors: Black, White, Red, Yellow, Blue.
AF SET 2 - Secondary Colors: Green, Orange, Violet, Brown, Turquoise.
AF SET 3 - Hot Colors: Pink, Green, Yellow, Blue, Violet.

WORKING WITH:

LEATHER

First prep the leather by cleaning with acetone and a clean cloth. This takes off dirt, oil and waxes so that the paint will adhere. Sketch the design out with white or lay down a light base coat of white and proceed as normal. It is sometimes necessary to use several light coats rather than one heavy coat to bring color out. Use a compact hair dryer to speed drying and to cure the paint. When the artwork is dry, rub with mink oil or good quality leather treatment.

DENIM

Light denim will work much the same as a T-shirt. Dark denim should be pre-washed to remove sizing from material. Sizing will prevent colors from adhering to the material. Sketch out your design with white. Some artists prefer to lay down a base coat of white and then work the design like a T-shirt. Because denim is so thick, multiple coats of color are necessary. A compact hair dryer speeds up the process of painting multiple coats. NOW, for extra wash fastness, top coat your artwork with top binder and heat set.

AUTO TAGS

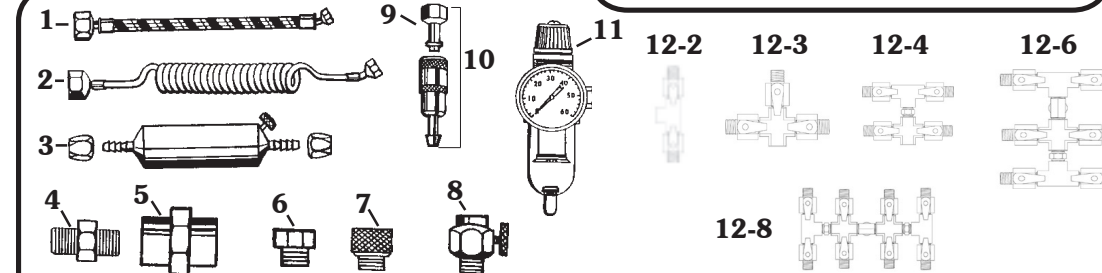

Scuff the tag lightly with 600 grit sandpaper or a fine scotch bright pad. Next, lay down a light coat of white, light blue or gray, depending on the design you are painting. This helps the colors that follow to cover more evenly and dry faster. A compact hair dryer to dry the paint as you go along greatly increases productivity. Now, dry the artwork and top coat with a quality "high gloss" clear acrylic enamel. When painting tags, use retarder very sparingly in your colors. Too much will result in fish eyes (round spots where the color does not cover).

Did you know E'TAC Extend - Air is a beefed up version of E'TAC Private Stock base? It contains additional cross-linking materials as well as all the enhancements found in E'TAC Multi-Substrate line of colors meaning you can reduce it with water to a water-color consistency.

Can be used alone as a Top Binder, prior to working on dark garments, to seal the fabric. Use, as well, over completed fabric art to add additional protection and finish.

Heat set after drying @ 340 degrees F for 16 seconds. Iron hot as possible without scorching if no heat press is available. Turn inside out or use wax paper to reduce drag.

Q: What is meant by dual-action and single-action?

A: These are two different types of airbrush triggers. Single-action airbrushes are activated by simply depressing the trigger; a preset amount of paint is automatically sprayed. To change the amount of spray, you must stop airbrushing and reset the needle adjustment screw. These are recommended for students because they are less expensive than dual-action. With the more sophisticated dual-action airbrushes, when the user depresses the trigger, only air is released; the second action of drawing back on the trigger releases the paint. This dual-action—down, then back—enables the user to adjust the volume of spray simply by manipulating the trigger and without stopping.

THIS AIR HOSE WORKS WITH ALL MAJOR BRANDS OF AIRBRUSHES.

BE SURE TO ORDER THE CORRECT ADAPTER FOR YOUR AIRBRUSH.

Today, airbrushes are used in a multitude of applications. Artists who use the airbrush will generally have several different types (external or internal mix) as well as styles (gravity- or siphon-feed) on hand for a variety of uses. When selecting an airbrush, consider the type of effect desired (coarse or soft spray), size of area to be painted and type of material to be sprayed.

THAYER & CHANDLER **Vega 2000**

This airbrush was designed with the T-shirt artist in mind. The Vega 2000 is engineered for easy maintenance, durability and precision artwork. All metal construction with chrome and nickel plated interior parts with an aluminum handle that provides balance without added weight. Designed for maximum performance, the Vega 2000 features a cut away handle that enables quick declogging of the tip. Smooth trigger action and almost twice the needle travel of other airbrushes enable the artist to achieve the finest lines and greatest finger tip control possible.

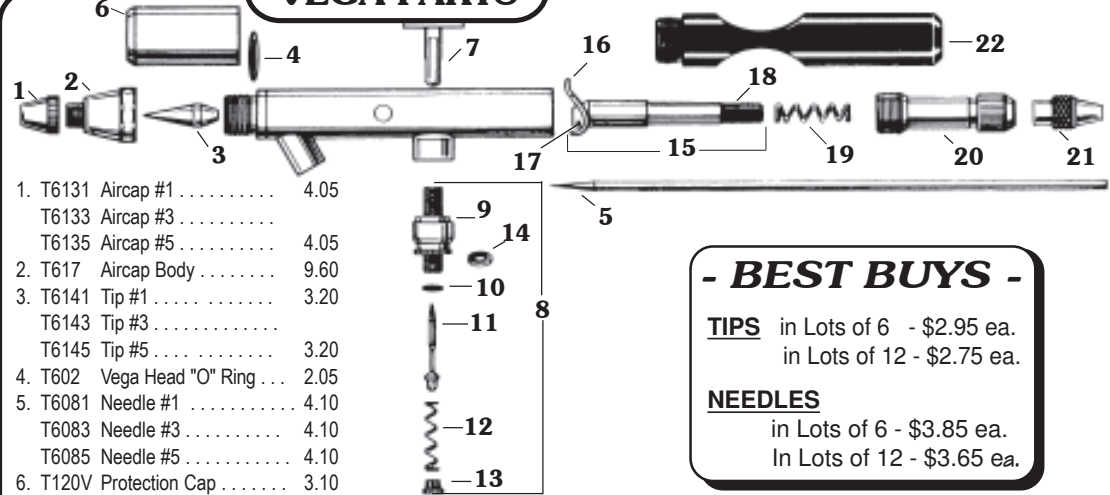

VEGA 2000 #3L Airbrush without Accessories:

BY VEGA

\$69.50

The Omni Detail Gun was designed to produce extreme detail. It offers a unique revers-a-guard air cap that enables the finest lines and also fine atomization for even coverage. The Omni is well balanced and has smooth trigger action. A durable chromed exterior, hard nickel interior, and solvent resistant rings, enable the Omni to withstand harsh solvents. It uses only one tip-needle combination to cover all spray ranges. All internal parts are compatible with the Vega and it uses the same bottles and jars. The Omni is a joy to use and compliments the Vega Airbrushes you may already own.

THE DELUXE KIT CONTAINS

- Airbrush
- Airhose
- Extra Tip & Needle
- 1 - 8 oz. Trans. Black
- 8 - 4oz. Colors (white, red, yellow, blue, bright orange, violet & hot pink)
- 1 - 4 oz. R-100
- 1 - 4 oz. T-100
- 12 VLP 3 oz. Bottles
- 1 Pack of Reddi Caps
- 10 Sheets of Pellon
- 6 Practice Tranfers

BASIC KIT

Everything you need to get started in Airbrushing except the Air Source!

THE BASIC KIT CONTAINS

- Airbrush
- Airhose
- Extra Tip & Needle
- 5 - 4oz. Colors (white, red, yellow, blue & black)
- 6 VLP 3 oz. Bottles
- 1 Pack of Reddi Caps
- 10 Sheets of Pellon
- 6 Practice Tranfers

AIR COMPRESSORS

1ST
Most airbrushes used for T-shirt painting use approximately 1 cubic ft. of air per minute. This is referred to as (CFM). If the compressor produces less than this it will always be working at maximum capacity to keep up with minimum air use of the airbrush. Industrial units are rated at 100 P.S.I. Pressure. The rating to look for is CFM Free Air at 100 P.S.I.

2ND
The compressor should have a piston pump with a cast iron cylinder. The air pump is the part of the compressor that actually compresses the air. Commercial artists need an air pump that's oil lubricated. Industry specifications note that oil lubed pumps have as much as twice the service life of oil-less units. NOTE: You do have to check the oil level and add oil occasionally. Oil-less units are ok for occasional, light duty use.

3RD
The motor is what turns the air pump, usually electric. Look for low ampreage use in relation to CFM output of the air compressor. It should also be equipped with an overload reset switch.

4TH
Last but not least, you must have an airtank to store the compressed air. This provides an even flow of air without the sputtering of tankless units. A regulator with a moisture trap completes the air source. Now plug in your airbrush and start painting.

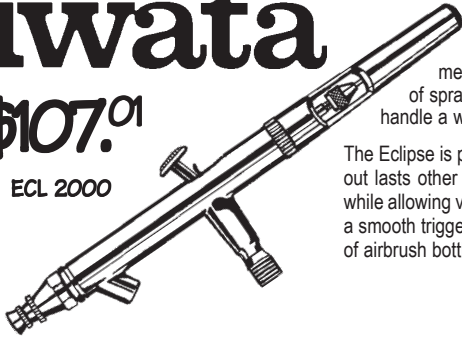

Call us. Due to the many types of air compressors, we don't carry them in inventory - however, we can special order whatever you need and have it to you within 7-10 days.

iwata

\$107.⁰¹

ECL 2000

The Iwata Eclipse is a dual action, internal mix, bottle feed airbrush. It is designed for artists requiring reliability and performance. T-shirt painters, fine artists, sign and automotive painters all find that the Eclipse meets their needs. This is a very versatile airbrush, capable of spraying fine hair lines and broad, even coverage. It can also handle a wide variety of paints from heavy enamels to water-based acrylics and fine lacquers.

The Eclipse is precision made from the finest materials. The tip is made from steel - not brass - and far out lasts other brands' airbrush tips. Iwata also designed an aircap that protects the tip and needle while allowing very close precision work and is still easy to clean. The airbrush is well balanced and has a smooth trigger control that ensures consistent performance. The Eclipse accepts most major brands of airbrush bottles and jars so you can use the ones you may already have.

COMMON AIRBRUSH TERMS

internal mix—a type of airbrush where the paint is atomized inside the airbrush tip. (All IWATA airbrushes are internal mix, including the new Eclipse.)
external mix—a type of airbrush where the paint is atomized outside the airbrush tip (SprayCraft Airbrush).
single action—a method of activating an airbrush whereby depressing the trigger delivers both air and paint simultaneously (SprayCraft Airbrush).
dual action—a method of activating an airbrush whereby depressing the trigger delivers air and drawing back on the trigger releases paint. (All IWATA airbrushes are dual-action, excluding the new Eclipse SA.)
bottom feed—a siphon-feed system where paint is drawn up from a reservoir (jar or color cup) mounted underneath the airbrush (IWATA HP-BC and BE, Eclipse, and LPH95).
side feed—a siphon-feed system where paint is drawn from a reservoir (color cup) mounted on the side of the airbrush (IWATA-HP-SB and Custom Micron SC).
gravity feed—the system where paint is drawn into an airbrush from a reservoir mounted on top of the airbrush (IWATA HP-C, HP-A, B and C, Custom Micron B and C, RG-2, LPH94 and LPS2-1).

Paasche VL Airbrush

This is the most popular and dependable airbrush used by T-shirt artists today. It features double action control and interchangeable multiple head assemblies. The VL can withstand continuous use and has earned the name "The Workhorse" of the industry. The VL has a self centering tip that is designed to allow fluids to flow freely. This airbrush is capable of fine lines and broad coverage. The VL-1 is best suited for light fluids such as inks, dyes and water colors. The VL-3 is suited for thinned acrylics, enamels and lacquers. The VL-5 is for heavy fluids like enamels. The recommended air pressure is from 20 to 60 psi depending on tip size and type of fluid being sprayed. The VL requires 1 cubic foot of air per minute.

PRICE MATCHING

Although we price our items aggressively, you may, on occasion, find a lower price somewhere else. If you prefer to order from us - give us a call - we'll try to match the lower price - or beat it - if we can. Our only requirement is that our competitor must have the item in stock, ready to ship.
